SUMMARY

Product designer and Computer Science student (Health Informatics minor) who ships polished, accessible products end to end, from user research and Figma prototypes to production React and React Native code. Blends design thinking with front-end engineering to close the gap between design and build. Seeking Summer 2027 Product Design, UI/UX Design, and Product Design Engineer internships.

EDUCATION

University of Houston

Expected May 2028

B.S. in Computer Science, Minor in Population Health (Health Informatics) | GPA: 3.6

Houston, TX

- **Relevant Coursework:** Data Structures & Algorithms, Graph Theory, Formal Languages, Database Systems

TECHNICAL SKILLS

Design: Figma, FigJam, Wireframing, Prototyping, Design Systems & Tokens, User Flows, Information Architecture, Interaction Design, Responsive Design, Accessibility (WCAG), Usability Testing, Adobe Photoshop/Illustrator/XD

Frontend: React, React Native, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Framer Motion, GSAP

Programming & Tools: Python, Java, C++, SQL, Git, GitHub, REST APIs, Jira, Linear, Notion, Miro

PROJECTS

DigitalUH | UH Student Experience Platform | React Native, TypeScript, Figma

2026

- Led an end-to-end redesign of the University of Houston student mobile experience, auditing core campus services and mapping usability pain points through competitive analysis, user flows, and journey mapping.
- Designed 20+ high-fidelity screens in Figma on a reusable component library and design-token system, maintaining design-development consistency and enabling rapid iteration.
- Prototyped AI-assisted, user-centered flows for campus navigation, dining, shuttle tracking, and scheduling; validated task flows with peers, reducing steps-to-complete for common student tasks from 6 to 3.
- Implemented production React Native interfaces from design specs, owning developer handoff and preserving 1:1 design-to-build fidelity through shared components.

Fusion 36° | Coffee & Boba Ordering Platform | React, TypeScript

2026

- Partnered with a local business to translate brand and business goals into a responsive, conversion-focused ordering experience while owning user research, UI design, and front-end implementation.
- Designed the full customer journey (menu discovery, drink customization, promotions, checkout) backed by a documented design system: type scale, color tokens, spacing, and reusable components.
- Built an interactive drink-builder with purposeful microinteractions and motion, improving customization clarity and usability across mobile and desktop.
- Applied WCAG contrast standards, semantic hierarchy, and keyboard-navigable components to deliver an accessible, responsive interface.

EXPERIENCE

Student Technology Assistant

Aug 2025 – Present

University of Houston

Houston, TX

- Support thousands of students and staff by troubleshooting software, authentication, and account issues, practicing user empathy, clear communication, and structured problem solving under time pressure.
- Investigate technical issues, document reproducible resolutions, and collaborate cross-functionally with campus teams to improve service efficiency.

Undergraduate Researcher, UR2PhD Program

Feb 2026 – May 2026

University of Houston

Houston, TX

- Built reproducible Python pipelines (NumPy, Pandas) to clean, transform, and validate high-dimensional datasets, then communicated patterns through ParaView and Python visualizations, applying the analytical synthesis mindset behind turning research into design decisions.

Teaching Assistant

Aug 2023 – Dec 2024

Lone Star College

Houston, TX

- Mentored students one-on-one in Python, SQL, and debugging, breaking complex concepts into clear, learnable steps and strengthening communication, patience, and attention to detail.
